

Change mesh frames quickly and safely with the **Russell Screen Changer**

For use with most round separators, from 48" - 60" diameter

One Russell screen changer enables you to change screens quickly and safely on several machines with up to 4 screen frames on each machine.

It therefore improves your productivity and looks after the health and safety of your operators.

Improves operator safety

- No more manual lifting necessary.
- Reduces the risk of injury.
- Creates more space to work when changing screens.

Increases your productivity

- Reduces downtime with easier, faster screen changes.
- No additional tools required.
- Only one operator needed to change mesh screens.

Reduces costs

- Protects screens and other equipment from damage.
- Saves time and labour.
- One Screen Changer can service all the screeners in your plant.

Flexible

- Lift up to 4 decks at once.
- More space to work under machines.
- Mobile version for use on multiple machines if required.

How the Screen Changer works

The unit simply clicks into place and enables you to access any screen frame in a matter of seconds without the need for additional tools.

The Russell Screen Changer uses a power pack device to lift up the decks above the screen you want to change. You simply connect the hooks to the screener, remove the clamp from the screen you wish to change and activate the lift button.

The Russell Screen Changer gives more clearance than any other lifting device on the market, giving your operator more room to work in therefore making it easier to change the screen. For added safety there is a lock-off system to prevent accidental operation of the unit while operators change mesh screens.

Mobile for even greater flexibility

The screen changer is also mobile, enabling it to service as many screeners as you have in your plant. Furthermore it can be used on Russell screeners or any other round screener, from 48" (1200mm) to 60" (1500mm).

Keep your process lines flowing with complete peace of mind

Russell have been manufacturing sieving and separation equipment for over 70 years. Use our experience to solve your process problems.
